

KIMBER's UPDATE - SEPTEMBER 2026

After a summer of doing TWR work from home, my diary is filling up with overseas travel again. Last week I returned from our West Central Asia transmitter site. It was a busy time. The company who designed our antenna system (picture above) were there. They modified it so we could broadcast more programmes into the Arabic world. At the same time, a commissioning engineer from the company who designed our transmitter tried to stop it getting so hot, but unfortunately he was unsuccessful. I repaired 6 circuit boards that failed since our last visit, restocked the store of spare parts, checked some transmitter documentation and assisted the antenna company and the transmitter engineer.

We continue to be encouraged by the positive response we have to our broadcasts. Here is feedback from a listener to one of the programmes broadcast from Central Asia.

"I am married and blessed with three children. My husband works in a workshop, and as a family, we have faced many challenges. By the grace of God, I accepted Christ through the Woman of Hope radio programme. Since then my faith has grown, and we now hold prayer meetings in our home every week secretly. We humbly ask that you remember us, our fellowship, and our country in your prayers, especially for peace, safety and the well-being of our leaders. May God bless you all."

Family news:

Jessica has just started her gap year. She hopes to do some travelling and get a job. She has already spent a few weeks touring Europe with college friends using a railcard. Getting a job is turning out to be rather difficult. She has a firm offer to study at Bristol university next year.

Bernice is in the second and final year of her T-level in Health at Exeter College. She has started learning to drive

Jean still works part time as a book keeper with a local charity. At the moment she is busy preparing the end of year accounts.

Thank you very much for your prayers,

Graham & Jean
